

The figure displays the percentage of the population aged 65 and over in various US states from 1970 to 2018. The states are arranged in a grid, and the charts are color-coded by region: blue for the West, orange for the South, and green for the Midwest and Northeast. The charts show a general upward trend in the aging population across all regions, with the South showing a more pronounced increase in the later years.

State	Region	Color	1970 (%)	2018 (%)
AK	West	Blue	1.0	1.5

1970 2018

1970                      2018

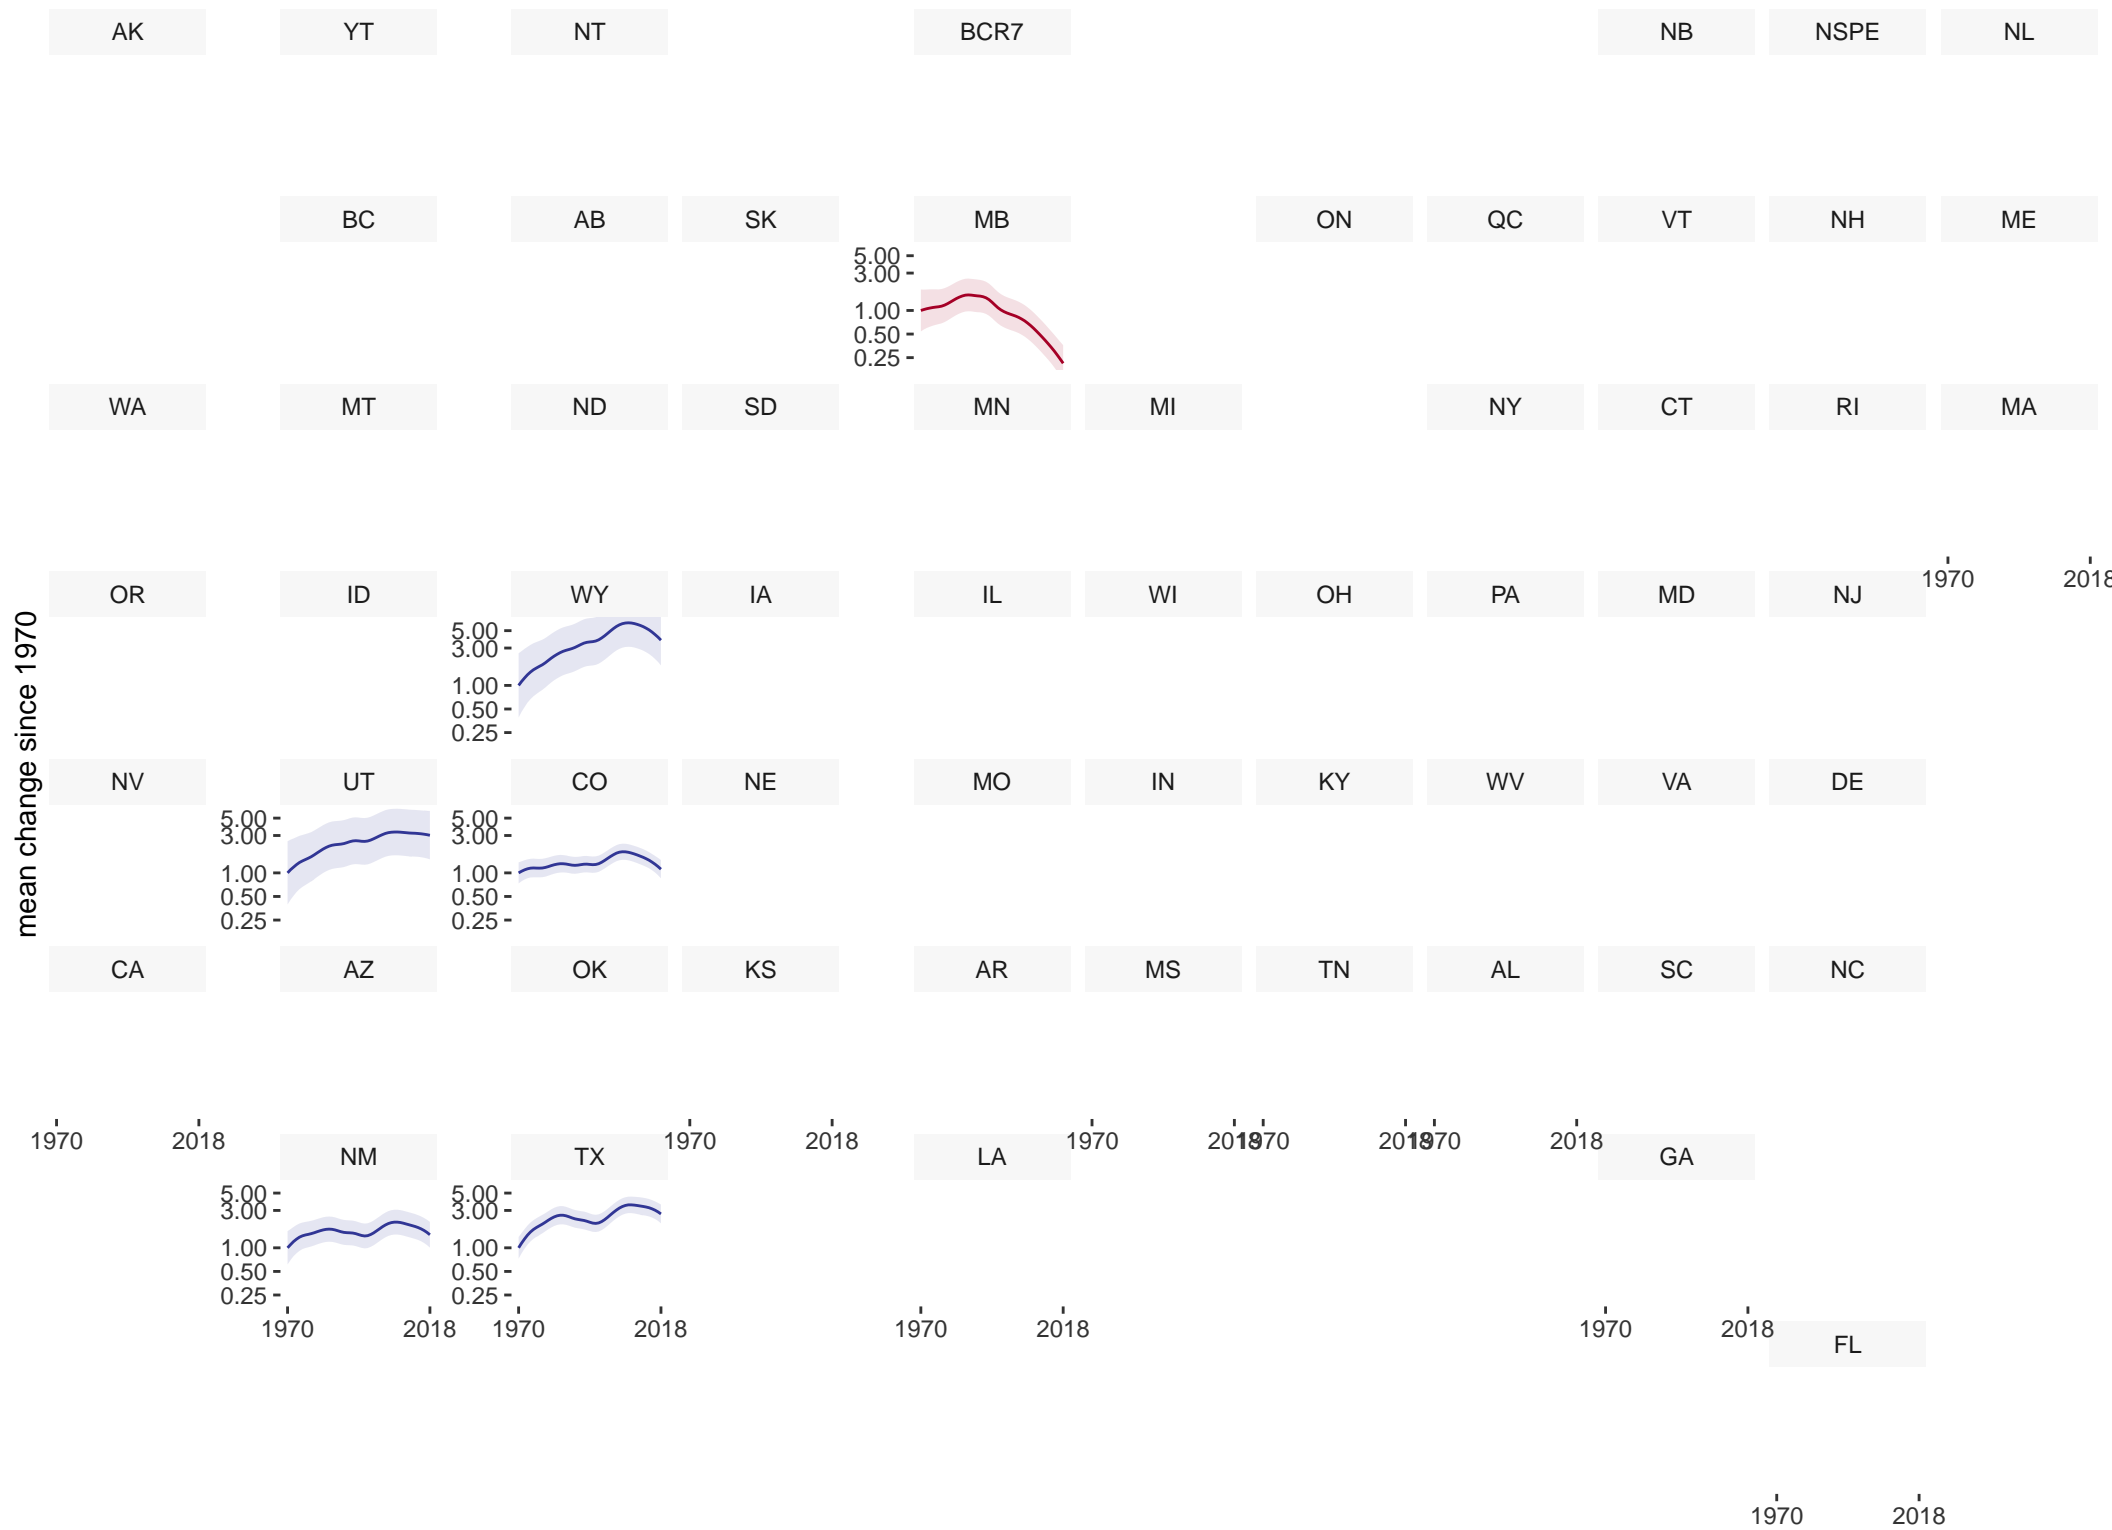

The figure displays a grid of 50 US state abbreviations arranged in 10 rows and 5 columns. Four line charts are overlaid on the grid, each representing a different state's trend from 1970 to 2018. The charts are for states MB, WY, UT, and NM, each with a colored line and shaded area representing a range.

- MB (Minnesota):** Red line, shaded area in light red. The trend starts at 1.00 in 1970 and decreases to approximately 0.25 by 2018.
- WY (Wyoming):** Blue line, shaded area in light blue. The trend starts at 1.00 in 1970, remains relatively stable, and ends at approximately 1.00 in 2018.
- UT (Utah):** Orange line, shaded area in light orange. The trend starts at 1.00 in 1970 and decreases to approximately 0.25 by 2018.
- NM (New Mexico):** Orange line, shaded area in light orange. The trend starts at 1.00 in 1970 and decreases to approximately 0.25 by 2018.
